

Residential—Green Woodwork

This is a unique opportunity for bonding and learning to take place at the same time. Throughout this two day Residential we will cover the basic principles of green wood working, including harvesting, coppicing, splitting, shave horse, pole lathing and building. This session is very hands on and we aim to have every participant make something they can take home with them. we will also include a range of team building sessions to allow the group to bond more closely.

- Totally customisable
- 2 Days, 1 Evening
- Encompassing learning and bonding
- Up to 10 participants per group
- A great start and development for wood working practices
- Confidence Building
- Outdoor skills building
- Inspirational ideas
- Hands on learning

Green woodwork-
ing is carpentry that
works unseasoned or "green"
timber into finished items. Un-
seasoned wood is much softer
than seasoned timber and is
therefore much easier to shape
with hand tools.

We will be using a range of hand
tools, from a bit and brace to ax-
es, adzes, draw knives, knives
and chisels. We will be using a
range of techniques from wood
sourcing, management, split-
ting, shave horse work, pole
lathing and basic structure de-
sign and construction.
