

Residential—Permaculture

This is a unique opportunity for bonding and learning to take place at the same time. Throughout this two day Residential we will cover the basic principles of permaculture including design and hands on session, we will also include a range of team building sessions to allow the group to bond more closely. We are sure that after this session participants will think more deeply about working with nature and collaborating with one another.

- Totally customisable
- 2 Days, 1 Evening
- Encompassing learning and bonding
- Up to 15 participants per group
- A great start and development for sustainable practice
- Confidence Building
- Off-Grid Experience
- Permaculture design
- Inspirational ideas

Permaculture is a branch of ecological, environmental and sustainable design, building and engineering. Although it's mainly aimed at agriculture and growing the principles of permaculture can be aimed to aid any project.

It allows you to think through waste management, nature connection, resource uses and is commonly coined as gardening as if nature matters.

Join us to learn and live permaculture and you will leave with loads of new ideas and inspiration.
